

CIG-DU

Portable Ciglow Lighter Unit without Timer

Mounting Style

This unit is fitting with a cable and connected to a mains socket using a standard plug. The unit is designed to be placed on a desk or on a shelving unit. It is also intended for use in facilities where an internal mains supply cannot be permanently connected. It can be easily stored away or transported between rooms.

Weatherproof Rating

This unit is rated IP44 and is only suitable for indoor or covered use only.

Element

This unit uses the CIG-EL three pin plug-in element.

Operation

The unit is operated by pressing in the push button and holding. The cigarette is inserted once the element glows red.
