Ciglow
INDUSTRIAL SERVICES LIMITED

The CIG-UN has been designed with our long lasting three pin plug in element. This can be changed without disconnecting the power supply thus eliminating downtime. The CIG-UN can be supplied with an optional wired flex so that it can be connected to a mains power socket for increased portability. The CIG-UN can also be housed within our IP66 rated lockable enclosure to enable outdoor use and control over the operating hours of the unit.

The Ciglow lighter unit enables smoking to take place in a controlled environment thus eliminating the potential for people to harm themselves or others whilst protecting property and assets.

Specifications

- High quality powder coated finish
- IP44 rated
- Long lasting plug in element

- CE approved
- Available in 230 volt, 110 volt and 12 volt
- Compact and Lightweight for transportation
- Available with IP66 rated lockable enclosure

Dimensions (mm)

- Height: 145
- Width: 100
- Depth: 75

Colour

- Red

Benefits

Ciglow Flameless Cigarette Lighters provide you with greater control over the smoking habits of people on site. This can greatly reduce the risks posed by fire whilst providing a stylish solution to the problem of managing smoking without antagonising and alienating smokers. By eliminating lighters and matches you reduce the risk for people to harm themselves and others around them whilst protecting your assets from fire..

The Ciglow Timer

The units have a choice of two timing options, Manual (CIG-UN) and Timer (CIG-UN-T). The manual option requires the user to depress the push button for the required time to heat the element and light the cigarette.

The Timer allows the user to push and release the button allowing the unit to electronically heat the element on a timed cycle. The timer option is ideal for challenging environments where the unit may be exposed to high levels of use and the potential for misuse.

"Our employees offshore have no excuse to carry lighters. The installation of the unit was very simple and I would recommend the Ciglow flameless lighter unit"
