Ciglow
INDUSTRIAL SERVICES LIMITED

The CIG-SS wall mounted Flameless Lighter unit houses our fast heating element inside a tamperproof stainless steel enclosure. The CIG-SS has been designed for use in environments where naked flames pose a risk to people, property and assets.

The Ciglow lighter unit enables smoking to take place in a controlled environment thus eliminating the potential for people to harm themselves or others whilst protecting property and assets.

Specifications

- High grade Stainless Steel tamperproof unit
- Totally weatherproof – IP65 rated
- Anti Ligature design
- Tamper proof security screws
- Suitable for indoor and outdoor installation
- Available with safety control timer
- Fast heating long life element
- Illuminated push button
- CE approved
- Available in 230 volt, 110 volt and 12 volt

Dimensions (mm)

- Height: 230
- Width: 165
- Depth: 75

Benefits

Ciglow Flameless Cigarette Lighters provide you with greater control over the smoking habits of people on site. This can greatly reduce the risks posed by fire whilst providing a stylish solution to the problem of managing smoking without antagonising and alienating smokers. By eliminating lighters and matches you reduce the risk for people to harm themselves and others around them whilst protecting your assets from fire.

The Ciglow Timer

The units have a choice of two timing options, Manual (CIG-SS) and Control Timer (CIG-SS-CT). The manual option requires the user to depress the push button for the required time to heat the element and light the cigarette.

The Control Timer allows the user to push and release the button allowing the unit to electronically heat the element on a timed cycle, this includes a cooling down period to protect the unit and element. The Control Timer option is ideal for challenging environments where the unit may be exposed to high levels of use and the potential for misuse.

“The use of open flamed lighters or matches is a serious health and safety hazard in our line of work and having a Ciglow Flameless Lighter has dramatically reduced these risks.”
